

Heavy-duty Biomass recovery mulcher for prunings for tractors of 300 HP and more.

Mulcher with main feeder with BRALACK system, pre-grading and volumetric RHENDUEL 30, second grading and granulometry with rotor RHENDUEL 10, reaction-and-impulse turbine with independent transmission between the machine and the deposit.

### Reaction-and-impulse turbine

### Independent transmission for each rotor

## CHARACTERISTICS

- 3 point hitch category III - IV.
- Steel-plate chassis.
- Double hydraulic feeder, system Bralack.
- Pre-grading rotor and volumetric Rhenduel 30.
- Second refining rotor Rhenduel 10.
- Triple feed chain.
- 5 XPC side belt transmission.
- Independent transmission for each rotors.
- PTO 1.000 rpm.
- Model built under EC Normative.
- Safety indicators visible to personnel.

### Feeder BRALACK
