

Versatile mulcher in the withdrawal of prunings and branches in general.

Applicable to the industrial gardening for the withdrawal in urban environments, as well as for the withdrawal of material crushed in agriculture.

Applying its variants it is possible to work with all kinds of branches and in different climatic situations, included works with remains of trees of perennial leaves and material with many dampness.

Wight of the crushed material: 250 - 400 kg/m³.

CHARACTERISTICS

- Steel-plate chassis with a high elastic limit.
- Hopper capacity 6 m³.
- Hydraulically tipping hopper.
- Unloading height: 2,50 mts.
- Height adjustable rear wheels.
- Minimum power 100 HP.
- Hydraulic motor on pick-up system with high torque.
- Rotor Polser.
- PTO 540-1.000 rpm.
- Model built under EC Normative.
- Safety indicators visible to personnel.
